

Biology Summer Reading
College Prep, Resource Center

The teachers of freshman at Lenape Valley Regional High School would like to welcome all graduates from the middle schools and invite each student into an exciting new world of learning. The freshman year will provide a solid foundation for success in future educational experiences. In order to maintain reading practice and to prepare students for new learning experiences and expectations at the high school, the teachers are requiring that all students taking Biology (not just freshman) read the book The Violinist's Thumb by Sam Kean.

In September, this book will be discussed in Biology classes and a graded assignment will follow that discussion.

In Honors Biology, the summer reading will The Hot Zone by Richard Preston. The Honors Biology summer work can be found on the schools website at www.lvhs.org and will be due the first day of class. The summer assignment will count for a test grade.
